

MAINE

DEER/VEHICLE CRASHES

2002-2004

Wildlife crashes happen anywhere, anytime - but be especially alert:

- ◆ From dusk till dawn so slow down at night
- ◆ Driving through forested or rural areas
- ◆ When you see one deer or moose...they tend to travel in a group so there are often more animals nearby

If a crash is unavoidable...

- ◆ Apply the brakes
- ◆ Let up on the brake just before impact
- ◆ Aim to hit the tail end of the animal if possible
- ◆ Duck to minimize injury

Watch for the reflection of headlights in the eyes of a deer. Because moose are taller, headlights don't reflect in their eyes. Instead, be on the lookout for a tall silhouette.
